Protocols for High Risk Pregnancies: An Evidence-Based Approach

Author: John T. Queenan
Format: Paperback, 661 pages
Publisher: Wiley-Blackwell

Descriptions:
High-risk pregnancies present life-threatening challenges to two of your patients: the mother and her fetus. The direct, exemplary guidance in Protocols for High-Risk Pregnancy enables you to:

- better understand your patients' conditions
- devise optimum management strategies
- maximize the outcome and minimize the complications for both the mother and her fetus

To enhance clinical relevance, each protocol is written as if the patient were present. Evidence to support an intervention is given where it exists. The authors' experience provides additional wise counsel. Key references provide the springboard for a deeper understanding of a topic.

Musculoskeletal Anatomy is the first title in the brand new Netter's Correlative Imaging series. Series editor and specialist in musculoskeletal imaging Dr. Nancy Major and coauthor, Michael Malinzak, presents Netter's beautiful and instructive paintings and illustrated cross sections created in the Netter style side-by-side with high-quality patient MR images created with commonly used pulse sequences to help you visualize the anatomy section by section. With in-depth coverage and concise descriptive text for at-a-glance information and access to correlated images online, this atlas is a comprehensive reference that's ideal for today's busy imaging specialists.

Descriptions:

Thoroughly updated for its Fourth Edition, this convenient, portable handbook is a comprehensive guide to the evaluation of more than 530 signs and symptoms. It has all the assessment information busy clinicians need in a single source. Each entry describes the sign or symptom and covers emergency interventions if needed, history and physical examination, medical and other causes with their associated signs and symptoms, and special considerations such as tests, monitoring, treatment, and gender and cultural issues. This edition identifies specific signs and symptoms caused by emerging diseases such as avian flu, monkeypox, respiratory syncytial virus, norovirus, metabolic syndrome, blast lung injury, Kawasaki disease, and popcorn lung disease. New information on patient teaching and obtaining a health history is included.
