T69  
2009

**Descriptions:**

Intended to emphasize the principles to be applied in managing general surgery patients. For a student who is in a rush to prepare for a particular case or problem, this is a good way to become knowledgeable quickly. It follows the medical student objective format as put forth by the boards and accreditation agency, using problem-based cases which tie together symptoms and signs with a disease. It is a well done book and certainly accomplishes its goal of providing students with a large amount of information about a particular type of problem.
